## ProDocTivity ToolManager™

### Take control of your entire tooling environment

Managing the purchasing, calibration, tracking, and lifecycle of thousands of tools and multiple cribs is complex, and integrating these systems with IT is challenging. Paper-based, labor-intensive tool management systems are not efficient enough for today's sophisticated shop floor. The need to reduce scrap, streamline projects, and lower costs is paramount. RealVision® Productivity ToolManager software is a comprehensive, "green," tool and crib management system that accurately and cost-effectively puts you in complete control of your shop floor tooling environment—reducing paper usage and boosting your bottom line.

### The most efficient tool system available!

Web-based and IT-friendly, RealVision ToolManager manages tool purchasing, calibration, tracking, location and life cycle for multiple tool cribs, project and task status, reporting, and much more. Authorized personnel can monitor the entire workflow, including tool availability, inventories, tool issuing,

Figure 1. Easily pick the right tool for the job, order and view tools, view graphics, combine picked tools.

and crib activities from any PC or wireless device on the network. ToolManager also protects you against theft as part of its revolutionary tool crib and operations management. Scalable to meet your output demand from small business to enterprise, ToolManager is the right choice to meet your tool management requirements today and tomorrow.

ToolManager is available as a standalone solution, as well as a fully integrated module to the ProDocTivity Integrator Manufacturing Execution System (MES), with the flexibility to dynamically retrieve data from legacy or standard applications including MRPII, CIM, ERP, EDI, and more.

### A tool system that makes complexity manageable

RealVision ToolManager makes managing the details of workflow easier, not harder. Our clients rely on the system daily to track outstanding actions for any work order with our exclusive To-Do List capability. You also gain increased flexibility and control to manage diverse, nonstandard production cycles with naming and numbering codes coming from multiple suppliers—all recorded with organized ease and consistency.

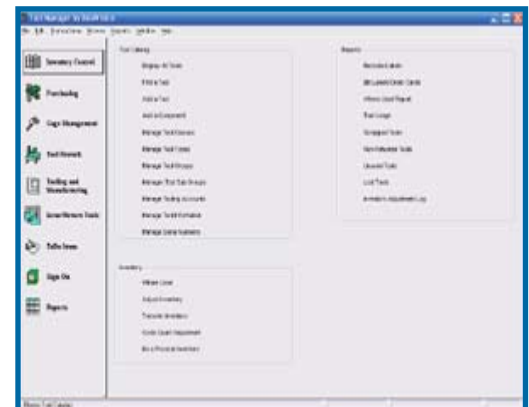

Figure 2. Easily manage inventory, monitor workflow and work order process.

The RealVision Connect™ ODBC framework environment, available in three database types, makes data available for standard reporting using predefined templates for critical information, including inventory value, cost per job, tool usage and history, hazardous materials, and more. You can also export data from ToolManager's rich database to external tools like MS-Excel and Crystal Reports for custom reporting needs.

*"We chose RealVision ToolManager for its built-in flexibility that allows us to tailor shop information for our shop floor."*

Rick Toth, President,, Toth Industries

### ToolManager gives you:

- Complete and accurate tool & crib management
- Reduced paper usage—Go Green
- Scalability to grow

## RealVision™ ProDocTivity™ Solutions

- Integrator™
- DocManager™
- WebDNC™ (ToolSet™)
- ToolManager™
- RealVision Preventative Maintenance™ (RPM)
- ProDocTivity Suite

The Shop Floor Productivity Experts

## System Specifications:

- 500 MHz or higher
- 256 MB RAM or higher
- CD-Rom or DVD drive
- 1024 x 768 or higher resolution monitor

## Network:

- Compatible with most network operating systems
- Minimum 4 MB disk space required

## Operating Systems

- Windows Vista, XP Pro, XP, 2003, 2000, NT 4.00, 3.51, 3.11, 95, 98, 98SE, Terminal Server, Citrix

## Database

- Oracle
- MS SQL
- MS FoxPro

## Full wireless support for PDAs

RV ToolManager supports handheld barcoding for issuing and receiving tools, taking physical inventories, tool tracking, and purchasing using the latest PDA wireless scanners.

## Document linking

RealVision ToolManager includes an integrated viewing package which supports unlimited and different file formats such as PDF, CAD/CAM, and more, allowing the user to link and view multiple documents related to specific tools. Combine with RealVision DocManager for expanded tooling with critical documents from other departments.

## Why RealVision

With 25 years of experience, RealVision Manufacturing Solutions' unparalleled knowledge of manufacturing and shop floor operations is built into each of its products. Built by engineers and for engineers, these practical solutions easily adapt to any manufacturing environment to provide all the efficiency and flexibility you need to manage your production systems flawlessly and build productivity, reduce scrap, save time, and lower costs. Contact RealVision today at 1-800-487-1031 to request a free demo—the best way to visualize how RealVision can improve your tool and shop floor productivity and boost your bottom line.

RealVision Manufacturing Solutions,

## The RealVision Difference

### Services

RealVision's hands-on manufacturing and operations experience uniquely qualifies us to meet our customers' demands in their complex shop floor environments. RealVision ProDocTivity solutions provide you with best-in-class paperless shop floor solutions, as well as a partner who backs you with quality services when needed. Our range of services support RealVision solutions, from your password-protected online access to Web self-serve support, to one-on-one technical support from our staff. We also specialize in software customization for specific customer needs and training to best meet your business demands.

### Solutions

RealVision has been providing manufacturing and management software solutions for industry since 1986. Scalable to meet your highest demand, our customer testimonials demonstrate our proven leadership in shop floor operations management. **The full RealVision portfolio of ProDocTivity solutions includes:**

#### RealVision Integrator

RV Integrator is a paperless "green" Manufacturing Execution System (MES). With a powerful database, the RealVision Connect ODBC framework allows application connectivity to link your existing routing, BOM, and MRP info with blueprints, work instructions, and process documentation. Integrator supports ODBC connectivity with Oracle and Microsoft SQL data tables to create client-server environment. Integrator also includes work instruction authoring tools, "smart forms," photo library, tool list authoring, and third party file management.

#### RealVision DocManager

RV DocManager is a paperless shop floor documentation and change management system that manages manufacturing documents -- CAD files, sketches, scanned images, and more. DocManager simplifies compliance with ISO 9000 requirements, handles the logistics of document distribution and viewing, and ENC tracking.

#### RealVision ToolManager

RealVision ToolManager manages tool purchasing, calibration, tracking, location and life cycle for multiple tool cribs, as well as project and task status, reporting, and much more. Includes RealVision ODBC Connect Framework networked solution. Allows authorized personnel to monitor the entire workflow, including tracking tool availability. Scales to manage requirements today and tomorrow.

#### WebDNC (and ToolSet)

RealVision WebDNC is the most advanced and powerful DNC communication system available today. Includes all the features of a standard high end DNC system plus program revision control, tool list management, part and job databases, integrated machine tool monitoring, NC programming, data collection, tool life integration, and document and drawing linking, Integrates with RealVision ToolSet.

#### RealVision Preventative Maintenance (RPM)

RPM schedules maintenance and tracks all related costs as well as the service part inventory to keep your equipment running. Powerful purchasing functions make it easy to control inventory and ability to order outside maintenance services. The work order system not only facilitates the collection of scheduled maintenance information labor and materials, but also handles all unplanned and emergency service.

#### Productivity Suite

Combine any or all of the above standalone solutions (except RPM) to build a custom, integrated solution that gives you complete control of your shop floor environment that far exceeds competitive offerings.
